FEATURING FRENIC MEGA

Our dependable REFLEX Variable Speed Drive is new and improved!

The REFLEX VSD now features the Frenic Mega Drive which is an exact replacement for the Frenic/GE P11 series. The Frenic Mega is a high-performance, multifunctional inverter developed to use with a variety of equipment by improving the basic performance, meeting the requirements for various applications, achieving lower maintenance and enhancing the resistance to the environmental impacts.

KEY BENEFITS

- ◇ Quicker response to the Operation Commands
- ◇ Prolonged service life
- ◇ Extra Functions for facilitating maintenance of equipment
- ◇ UL (United States/Canada) and CE (Europe) certified
- ◇ Improved performance of current response and speed response
- ◇ Improved durability in overload operation
- ◇ Maintenance warning signal output
